

WILHEN FERNEY GUTIÉRREZ PABÓN

Full Stack Developer | JavaScript · TypeScript · React · Node.js

+57 302 296 6372 | w.gutierrez1206@gmail.com | [GitHub](#) | [LinkedIn](#) | Cúcuta, Colombia | Immediate availability

PROFESSIONAL PROFILE

Full Stack Developer with 3+ years of experience and a track record of continuous growth: started in frontend development with React.js, self-trained in Node.js, NestJS and Angular, and progressively took on greater technical responsibility, leading project implementation and coordinating with other developers. End-to-end software development skills: interfaces with React, React Native, Remix and Angular on the frontend, and scalable REST APIs and backend services with Node.js and NestJS, with SQL and NoSQL databases (MongoDB). Strong foundation in JavaScript, TypeScript, HTML5, CSS3, OAuth authentication, third-party service integration and version control with Git/GitHub. Proactive, self-taught and focused on delivering value in agile teams.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java

Frontend: React.js, React Native, Remix, Angular, Redux, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, REST APIs

Databases: MongoDB (NoSQL), SQL, MySQL

Authentication & Integrations: OAuth 2.0, Google services, third-party API consumption, messaging services, workflow automation (n8n)

Version Control & Best Practices: Git, GitHub, Docker, Unit Testing, Technical Documentation, Agile Methodologies

Additional Knowledge: Spring Boot (basic level)

Profile: Full Stack Development, Web Development, Mobile Development, Technical Project Leadership, Performance Optimization

WORK EXPERIENCE

Node.js Backend Developer | BROERS S.A.S.

May 2025 – August 28, 2026 · Service contract (independent contractor) · Role performed: Full Stack

- Joined as a Node.js backend developer; learned and applied NestJS for building services and APIs.
- Although the contract defined a backend role, my responsibilities expanded to full stack: developed endpoints and consumed them on the frontend with Angular, a framework I had already mastered on my own.
- Provided support on projects built with Spring Boot (basic level).
- Optimized queries and databases to improve service performance and response times.
- Led, on my own initiative, the implementation of adjustments and improvements, coordinating with other developers on the team.
- Documented architecture, processes and development best practices to facilitate code maintenance.
- Managed and resolved bugs, keeping code continuously synchronized in the repository (Git/GitHub).

Development Analyst | Wiedii SAS

April 2022 – September 2023

- Joined as a frontend developer; the team trained me in React Native to support the development of a mobile project.
- Progressively took on greater responsibility, participating in technical decision-making regarding the app's development.
- On my own initiative, trained in Node.js to support the backend team as that need grew, expanding my role toward full stack development.
- Gained greater involvement within the team, contributing to problem-solving and technical decisions alongside the architect and lead developer.
- Implemented and consumed messaging services and external APIs, strengthening system interconnection.
- Was selected as second-in-command for the development of a React project in a separate team, coordinating implementation with other developers.

Freelance Software Developer | Independent

June 2021 – April 2022

- Established myself as a frontend developer, mastering React.js to build web interfaces for various clients.
- Supported REST API connections and integrations, and developed new features according to each project's requirements.
- Implemented and consumed OAuth authentication and Google services across different projects.
- Managed projects independently from conception through final delivery, ensuring timeliness and quality.

FEATURED PROJECTS

Internal Requests Management — El Surtidor BG SAS

Frontend: github.com/wfgp12/solicitudes-surtidor-front | Backend: github.com/wfgp12/surti-solicitudes-back

Full stack application built to track and manage internal purchase requests at the "El Surtidor BG SAS" warehouse. Frontend built with React, Vite, TypeScript and Redux, containerized with Docker; backend in Node.js/Express with MVC architecture, MySQL database and authentication.

PractiBot UFPS — github.com/wfgp12/practibot_ufps

Frontend for a chatbot-driven platform for managing university internship programs (applications, listings and agreements), built with React, Vite, Redux Toolkit, React Router and Shadcn UI, integrated with n8n automation workflows.

pokedux — github.com/wfgp12/pokedux

Practice project in React, TypeScript and Redux for global state management in a data-lookup application.

country-app — github.com/wfgp12/country-app

SPA built with Angular and TypeScript that consumes a countries API, with multiple search and filtering views.

EDUCATION

Systems Engineering — Universidad Francisco de Paula Santander (UFPS)

9th semester, in progress

Technical High School Diploma — Instituto Técnico Misael Pastrana Borrero

December 2016

CERTIFICATIONS — PLATZI

- Professional Git and GitHub Course (March 2022)
- Database Fundamentals (August 2022)
- Node.js Fundamentals Course (August 2022)
- React.js Course (May 2023)
- TypeScript Fundamentals Course (June 2023)
- TypeScript: Advanced Types and Functions Course (June 2023)

ADDITIONAL SKILLS

Languages: Spanish (Native); English A2 — able to read technical documentation, basic comprehension and elementary-level conversation

Soft Skills: Fast learning and adaptability, teamwork, time management, assertive communication, proactivity and self-directed learning
